DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/14/2005 has been entered.

Election/Restrictions

2. Claim 17 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 25 and 26 are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

3. Claims 1-4, 13, and 17-27 are allowed.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

US 6,956,701 to Peterson et al. teaches in figure 6 a light pipe with multiple beam splitters (94, 98) which is shown in figure 8 to include additional reflective planes, however the beam splitters do not perform in the claimed fashion.

US 2004/0047162 to Saccomanno et al. teaches in figure 1 a luminaire that includes a part (110 and 125) that appears to meet applicant's claims however the parts labeled 125 are not dichroic prisms and rather are TIR prisms which are not equivalent. Further it would not be obvious to modify Saccomanno to meet applicant's claims, since Saccomanno is directed towards a luminaire in a room, rather than that used in a display device. Since there is no need in a room to separate the colors, it would not be obvious to substitute dichroic surfaces for the TIR surfaces taught by Saccomanno.
